One Route Doesn't Fit Every MSME

"Different MSMEs behave differently, yet traditional acquisition uses the same route for all."

Core Insight: We Change the Question

TRADITIONAL SYSTEMS

“Who should we target?”

Treating MSMEs as a monolithic group, focusing only on lead volume and generic demographics.

SAHAJ PATHFINDER

“How should we acquire them?”

Recognizing that different MSMEs need different doors. Matching the acquisition route to the business context.

FROM ONE ROUTE FOR ALL → FOUR ROUTES FOR EACH MSME

Why One Door Fails MSMEs

One route, many behaviors: Static systems ignore the diverse operational realities of MSMEs.

Static scoring ≠ selection: Lead scores tell you 'if' to lend, lend, not 'how' to acquire.

Missed ecosystems: Generic campaigns fail to tap into supplier and advisor networks.

Rigid onboarding: Digital journeys aren't tuned to the specific role of the MSME.

THE CONCEPTUAL LEAP

TRADITIONAL APPROACH

Lead Scoring Box

Output: "Visit Branch" or "Click Generic Ad"

PATHFINDER ENGINE

Route Selection

Output: Direct, Advisor, Anchor, or Transaction Route

Sahaj PathFinder: Agentic Acquisition Engine

AN AGENTIC LAYER ON MSME SAHAJ AND YONO BUSINESS

01

DISCOVER

Identify MSMEs from business ecosystems (invoices, suppliers, advisors, anchors).

02

UNDERSTAND

Analyze likely motivation (growth, working capital, advisory dependence).

03

MATCH

Align with the right SBI offering (MSME Sahaj, SME Sahaj, SME Digital Loans, YONO Business).

04

SELECT

Choose the optimal acquisition route (Direct / (Direct / Advisor / Anchor / Transaction).

05

INITIATE

Launch personalized onboarding journey (digital (digital or assisted).

06

LEARN

Analyze outcomes and refine route logic via the the Learning Agent.

Four Doors Into SBI

ROUTE 01

Direct Route

- Targeting digital-first MSMEs.
- Seamless YONO Business & SME Digital Loans onboarding.

ROUTE 02

Advisor Route

- Engaging CA-driven businesses.
- Leveraging trusted advisors as strategic acquisition partners.

ROUTE 03

Anchor Route

- Tapping into supplier ecosystems of existing SBI MSMEs.
- Supply Chain Finance & YONO Business anchor relationships.

ROUTE 04

Transaction Route

- Addressing immediate working capital pressure.
- MSME Sahaj invoice-linked financing offers.

Example: Supplier Discovered Through Sahaj

EVENT

Existing SBI MSME customer uploads invoices on the MSME Sahaj platform.

DISCOVERY

PathFinder identifies a non-SBI supplier with high-frequency repeated invoices.

SIGNAL

Cash-flow patterns indicate immediate working capital stress for the supplier.

ROUTE SCORING

Transaction Route ranks highest. System triggers a contextual financing offer.

ACTION

Supplier receives a secure onboarding link via SMS / Email / WhatsApp Business.

OUTCOME: Supplier onboards digitally; new MSME customer acquired without traditional branch-led outreach

How PathFinder Thinks

ROUTE SELECTION BASED ON CONTEXT, NOT GENERIC LEAD SCORING.

PathFinder does not predict who to target. It determines the acquisition path most likely to convert.

Agentic Architecture on SBI Stack

PathFinder analyzes ecosystem signals, selects the optimal acquisition route, and initiates personalized SBI onboarding journeys.

Sahaj PathFinder Agentic MSME Acquisition Architecture

Uses only customer-consented, institutionally available and publicly permissible data

The SBI Ecosystem Flywheel

EVERY NEW CUSTOMER CREATES THE NEXT CUSTOMER

"EVERY ACQUIRED MSME BECOMES A SOURCE OF FUTURE ACQUISITION OPPORTUNITIES."

Why This Changes Acquisition?

TRADITIONAL ACQUISITION

“PathFinder does not decide **who** to target. It decides **how** to acquire each MSME.”

Strategic Impact for SBI

01

Acquisition Efficiency

- Increase digital onboarding through MSME Sahaj.
- Lower branch acquisition costs.
- Discover MSMEs hidden inside existing SBI ecosystems.

Branch

Digital

02

Ecosystem Expansion

- Every customer becomes a source of new customers.
- Convert supplier ecosystems into acquisition channels.

03

Portfolio Quality

- Offers triggered by real business signals.
- Better conversion with lower acquisition waste
- Reduce dependency on branch-led acquisition.

The MSME Door Engine for SBI

Every MSME enters SBI through a different door. PathFinder finds that door from data, context, and relationships.

DEPLOYABLE

Built natively on existing SBI platforms (MSME Sahaj, Sahaj, YONO Business).

SCALABLE

Every invoice creates new acquisition opportunities across the ecosystem.

AGENTIC

Continuously learns which routes convert best through iterative outcome analysis.

"SBI already has the customers. PathFinder helps SBI discover the next customers hidden inside their ecosystems."
